

Family Safe Training Presents

Women's Basic Handgun

This is a women's only course designed for students who have little to no knowledge about handguns.

Students will learn and demonstrate the seven basic fundamentals for safe and accurate shooting. The lesson is rounded out by taking those basics, and putting them into practice both in the classroom and on the shooting range. This lesson will act as a building block as the student progresses to Women's Intermediate Pistol.

This class also meets the criteria to apply for your Oregon Concealed Carry Permit upon completion.
